

TerraTec Home Cinema Upgrade Instructions

To enable the upgrade and gain access to its many new features, such as HDTV and Dolby Digital, you also have to install the latest version of TerraTec Home Cinema. You can download this version from our website at www.terratec.net.

Step 1: When you are done downloading, start the installation. When installing the software, please tick the box "I want to add or review serial numbers", and then click the "Next" button.

Step 2: Now you can enter your personal key, which has been sent to you in an e-mail. To do so, select the entire key, and then add it by copying and pasting it. Then click the "Finish" button—now you have access to the new features.

If you have problems activating your upgrade key, please contact our technical support team. For contact information, visit our website at www.terratec.net.

Important note:

Please be aware that the key is personalised, and contains your name and your e-mail address as well as the transaction numbers related to the purchase. We reserve the right to deactivate this key in response to misuse (such as transferring the key to a third party).
